Texwipe: The Leader in Critical Cleaning Products

Product Development
Texwipe is committed to supplying the highest quality, most consistent cleanroom consumable products. We invest in technology, innovation and quality to create and maintain state-of-the-art systems. www.texwipe.com.

Metrology
Many of the standard test methods used in the cleanroom wiper industry were developed by Texwipe. All sterile products are tested for endotoxins.

Manufacturing
Texwipe developed key manufacturing breakthroughs in cleanroom wipers including Vertex® and Vectra® Sealed-Edge.

Technical Support
Technical and practical support is supplied directly to customers to ensure effective cleaning protocols.

Product and Customer Support
Texwipe is the technical and market leader in cleanroom wipers. We provide innovative materials and services for cleaning critical environments in the electronics, pharmaceutical and medical device industries.

To support your needs, we provide:

- On-site Facility Audits
- Technical Training
- Technical Articles and Data Sheets
- Product Line Brochures and Guides
- Sample Binders
- Test Methods
- Website and Web-Store

Vertex® Pre-Wetted Sterile
Vertex® Microdenier Dry
Vertex® Microdenier Dry Sterile
### Vertex® Wiper Series

- 100% polyester material with a sealed edge/laser edge processed on Texwipe’s fully automated manufacturing system.
- Vertex® advances wiper manufacturing technology, bringing it to the highest level in the industry.
- Low levels of ions, NVRs (non volatile residues), particles and fibers for use in critical cleaning applications and environments such as wiping and cleaning surfaces, equipment and parts.
- Vertex® wipers are designed for high sorption capacity – ideal for spill control, cleaning and solution application.
- Tested for cytotoxicity and bacterial endotoxins for an extra level of contamination control assurance with consistent, optimized cleaning efficiency with repeatable wetness and VOC levels.
- Meets USP <797> and USP <800> requirements and are autoclave safe (dry wipers only).
- Individually lot coded for ease of traceability and quality control.

### Pre-Wetted

- Easy-to-use, recloseable slider bags reducing solution evaporation.
- Pre-wetted with 0.2 µm filtered 70% IPA / 30% DIW or 70% Denatured Ethanol / 30% DIW.
- Available dry (Vertex®), pre-wetted (Vertex® pre-wetted) and sterile.

### Vertex® Microdenier Wipers

- 100% polyester, nylon-free, material with a sealed edge processed on Texwipe’s fully automated manufacturing system. Vertex® advances wiper manufacturing technology, bringing it to the highest level in the industry.
- Offers increased lifting and capturing of particles as small as microbes.
- Quick wicking performance makes them ideal for streak-free cleaning and spill control.
- Unique microdenier construction allows the removal of oils and fingerprints.
- Ideal for surfaces susceptible to scratching and are nylon-free and compatible for applying Quaternary Ammonium Compounds (Quats) and other disinfectants and cleaners.
- Tested for cytotoxicity and bacterial endotoxins for an extra level of contamination control assurance with consistent, optimized cleaning efficiency with repeatable wetness and VOC levels.
- Meets USP <797> and USP <800> requirements and are autoclave safe.
- Individually lot coded for ease of traceability and quality control.

Vectra® Sealed-Border

Vectra® Alpha® 10
- 100% polyester with a sealed-border. Processed on Texwipe’s automated cleaning system. Vectra® advances the cleaning process and brings this technology to a higher level of wiper manufacturing.
- Vectra sealed-border technology provides low levels of ions, NVRs (non volatile residues), particles and fibers for use in critical cleaning applications and environments.
- Use on abrasive surfaces – will not easily snag or abrade releasing particles and fibers into the process or environment.
- Excellent chemical resistance for compatibility with a variety of solutions.
- Meets USP <797> and USP <800> requirements.
- Autoclave safe (dry wipers only).
- Individually lot coded for ease of traceability and quality control.

Pre-Wetted
- AlphaSat® with Vectra® Alpha® 10 wipers are pre-wetted with 0.2 µm filtered 70% IPA / 30% DIW, 10% IPA / 90% DIW or 6% IPA / 94% DIW for ease of use and provide consistent, optimized cleaning efficiency with repeatable wetness and VOC levels.
- Easy-to-use, recloseable slider and peel-and-reseal bags – reduces solution evaporation that preserves consistent wiper wetness level.

Collection | Size | Dry | Pre-Wetted | Dry Sterile | Pre-Wetted Sterile |
--- | --- | --- | --- | --- | --- |
Vectra® Alpha® 10 | 9" x 9" | TX1010 | TX8410 | – | TX3285 |
| 12" x 12" | TX1012 | TX8415 | TX3212 | TX3280 |

Vectra® Alpha 10 LT
- Low titanium dioxide (TiO2) 100% polyester with a sealed-border, processed on Texwipe’s automated cleaning system. Vectra® advances the cleaning process and brings this technology to a higher level of wiper manufacturing. Designed with a low level of titanium dioxide (TiO2), safe for processes that are affected by the presence of TiO2. The presence of TiO2 may leave an additional residue.
- Vectra® sealed-border technology provides low levels of ions, NVRs (non-volatile residues), particles and fibers for use in critical cleaning applications and environments.
- Use on abrasive surfaces – will not easily snag or abrade releasing particles and fibers into the process or environment.
- Excellent chemical resistance for compatibility with a variety of solutions.
- Autoclave safe (dry wipers only).
- Individually lot coded for ease of traceability and quality control.

Pre-Wetted
- Vectra® QuanSat™ LT is pre-wetted with 0.2 µm filtered 6% IPA / 94% DIW for ease of use.
- Easy-to-use recloseable slider bags – reduces solution evaporation that preserves consistent wiper wetness level.

Collection | Size | Dry | Pre-Wetted | Dry Sterile | Pre-Wetted Sterile |
--- | --- | --- | --- | --- | --- |
Vectra® Alpha® 10 LT | 9" x 9" | TX6659 | TX8691 | – | – |
**Vectra® AlphaSorb® 10**

- 100% two-ply polyester material with a sealed-border, processed on Texwipe’s automated cleaning system. Vectra® advances the cleaning process and brings this technology to a higher level of wiper manufacturing.
- Constructed from a double layer of polyester material creating a high sorption wiper ideal for spill control, cleaning, and solution application.
- Vectra® border seal technology provides low levels of ions, NVRs (non-volatile residues), particles and fibers for use in critical applications and environments.
- Use on abrasive surfaces – will not easily snag or abrade releasing particles and fibers into the process or environment.
- Excellent chemical resistance for compatibility with a variety of solutions.
- Meets USP <797> and USP <800> wiper requirements.
- Autoclave safe (dry wipers only).
- Individually lot coded for ease of traceability and quality control.

**Pre-Wetted**

- AlphaSor® with Vectra® AlphaSorb® 10 wipers are pre-wetted with 0.2 µm filtered 10% IPA / 90% DIW for ease of use and provide a consistent, optimized cleaning efficiency with repeatable wetness and VOC level.
- Easy-to-use, reclosable slider bags reducing solution evaporation that preserves the consistent wiper wetness level.

**Vectra® Honeycomb® 10**

- 100% polyester with a sealed-border processed on Texwipe’s automated cleaning system. Vectra® advances the cleaning process and brings this technology to a higher level of wiper manufacturing.
- Designed to combine the benefits of two wipers in one. One side contains honeycomb pockets for capturing and retaining particles including debris. The other side is smooth. Together, they form a high sorption wiper ideal for spill control, cleaning, and solution application.
- Vectra sealed-border technology provides low levels of ions, NVRs (non volatile residues), particles and fibers for use in critical cleaning applications and environments.
- Excellent chemical resistance for compatibility with a variety of solutions.
- Meets USP <797> and USP <800> wiper requirements.
- Autoclave safe.
- Individually lot coded for ease of traceability and quality control.

**Vectra® QuanTex™**

- 100% polyester with a sealed-border processed on Texwipe’s automated cleaning system. Vectra® advances the cleaning process and brings this technology to a higher level of wiper manufacturing.
- Each lot of QuanTex™ polyester wipers are tested for cytotoxicity by the Agar Overlay method and for Bacterial Endotoxins by LAL (Limulus Amebocyte Lysate) test for an extra level of contamination control assurance. Reports available upon request (TX1086 not applicable).
- Vectra® sealed-border technology provides low levels of ions, NVRs (non-volatile residues), particles and fibers for use in critical cleaning applications and environments – ideal for spill control, cleaning, and solution application.
- Meets USP <797> and USP <800> wiper requirements.
- Autoclave safe (dry wipers only).
- Individually lot coded for ease of traceability and quality control.

**Pre-Wetted**

- Vectra® QuanSat™ products are pre-wetted with 0.2 µm filtered 100% IPA, 70% IPA / 30% DIW or 6% IPA / 94% DIW for ease of use and provide a consistent, optimized cleaning efficiency with repeatable wetness and VOC levels.
- Easy-to-use, recloseable slider bags reduce solution evaporation that preserves the consistent wiper wetness level.

TexTra™ 10

- TexTra™ 10 is made from 100% polyester with a sealed border, cleanroom laundered, providing low levels of ions and NVRs (non-volatile residues) particles. Constructed from a single layer of polyester, equivalent to a two-ply absorbent capacity, creating a high absorbency wiper ideal for spill control, cleaning, and solution application.

- Use on abrasive surfaces – will not easily snag or abrade releasing particles and fibers into the process or environment.

- Excellent chemical resistance for compatibility with a variety of solutions.

- Meets USP <797> and USP <800> wiper requirements.

- Autoclave safe.

- Individually lot coded for ease of traceability and quality control.

TexTube® Wipers

- Two-ply 100% polyester with two sealed-border ends and rounded sides and is cleanroom laundered. Constructed from a double layer of polyester fabric creating a wiper with high absorption capacity, making it ideal for spill control, cleaning, and solution application.

- Manufactured to provide low levels of particles and extractables creating a wiper suitable for general cleaning and wiping.

- Use on abrasive surfaces – will not easily snag or abrade releasing particles and fibers into the process or environment.

- Excellent chemical resistance for compatibility with a variety of solutions.

- Meets USP <797> and USP <800> wiper requirements.

- Autoclave safe.

- Individually lot coded for ease of traceability and quality control.

**Pre-Wetted**

- TechniSat® products are pre-wetted with 0.2 µm filtered 70% IPA / 30% DIW, 6% IPA / 94% DW or 70% Denatured Ethanol / 30% DW for ease of use and provide consistent, optimized cleaning efficiency with repeatable wetness and VOC levels.
- Easy-to-use, recloseable slider bags, flip-top containers, tubs, and peel-and-reseal bags – reducing solution evaporation that preserves the consistent wiper wetness level.

**ProCell™**

- Cleanroom manufactured from 35% polypropylene (outer layers) / 65% cellulose (inner layer) nonwoven material with a cut edge, creating a wiper ideal for spill control, cleaning, and solution application.
- Suitable for general cleaning and wiping with excellent chemical resistance for compatibility with a variety of solutions.
- Individually lot coded for ease of traceability and quality control.

Nonwoven

**TechniCloth II®**
- Constructed from proprietary coated 45% polyester / 55% cellulose nonwoven material with a cut edge, cleanroom manufactured, creating a durable wiper ideal for spill control, cleaning, and solution application.
- Manufacturing process incorporates a proprietary coating that provides low levels of particles and extractables creating a wiper suitable for general cleaning and wiping.
- Good chemical resistance for compatibility with a variety of solutions.
- Meets USP <797> and USP <800> wiper requirements.
- Individually lot coded for ease of traceability and quality control.

**TechniScrub™**
- 50% polyester / 50% cellulose nonwoven material with a cut edge, cleanroom manufactured, creating a durable wiper with a textured side for removing deposits and a smooth side for follow-up wiping and cleaning.
- Superior sorption capacity.
- Provides low levels of particles and extractables creating a wiper suitable for general cleaning and wiping with excellent chemical resistance for compatibility with a variety of solutions.
- Autoclave safe.
- Meets USP <797> and USP <800> wiper requirements.
- Individually lot coded for ease of traceability and quality control.

BetaWipe®
FoamWipe®
TexWipe®
NuCotton®
PolySat®
Mold Release®
SolvSat®
**BetaWipe®**
- Composite of polypropylene material and cellulose material with a cut edge and is cleanroom manufactured. Constructed by thermally bonding nonwoven polypropylene outer layers over cellulose inner layers creating a wiper ideal for spill control, cleaning, and solution application.
- Use on abrasive surfaces – will not easily snag or abrade releasing particles and fibers into the process or environment.
- Excellent chemical resistance for compatibility with a variety of solutions.
- Autoclave safe.
- Individually lot coded for ease of traceability and quality control.

**TexWipe® and NuCotton®**

- Constructed from long staple 100% cotton yarn with a cut edge, cleanroom manufactured to reduce free floating fibers on the surface while still providing excellent wiping and cleaning.
- Made from sustainable and renewable materials grown and processed in the United States.
- Use on abrasive surfaces – will not easily snag or abrade releasing particles and fibers into the process or environment.
- Excellent chemical resistance for compatibility with a variety of solutions.
- Autoclave safe.
- Bias-cut to minimize edge shedding and fraying.
- Individually lot coded for ease of traceability and quality control.

**NSF Rated**

TX8723 PolySat® wipers are NSF rated to be acceptable for use as a general cleaner (A1) on all surfaces in and around food processing areas, where its use is not intended for direct food contact. Use of TX8723 in food processing or handling facilities requires that all food products and packaging materials be removed or protected prior to use of product. A potable water rinse of cleaned surfaces is required after use of this product. When used according to instructions, TX8723 PolySat® wipers will not exhibit a noticeable odor nor will it leave a visible residue.
Specialty

Mold Release® Sheets
- 100% durable, 2-ply spunbond polypropylene material with a cut edge, cleanroom manufactured, creating a low-linting chemical resistant wiper.
- Pre-wetted sheets provide consistent, accurate amounts of solvent for uniform application to mold surfaces.
- Point-of-use pouches designed for ease of use, minimizing exposure to hazardous vapors, lowering VOC emissions and eliminating potential for spills.
- Satin finish mold release.
- Quick cure at room temperature.
- Semi-permanent multiple releases.
- Optimized mold release usage.
- Individually lot coded for ease of traceability and quality control.
